INDEX

JANUARY TO DECEMBER, 1919

Note—Illustrated articles are marked with an (*) asterisk.

ARTICLES

Acetylene, use of in navy yards. Commander H. G. Knox *720
Activities of Todd Shipyards Corporation during the war 625
Akimoff, N. W.: Geared drive 16
Alabama Dry Dock & Shipbuilding Company. G. F. S. Mann, B. S. *251
Aldrich, H. L.: Some things I saw and heard in England and France *67
American Bureau of Shipping, work of commended by Edward N. Hurley 621
American Bureau of Shipping approves Thermit welding 805
American cargo handling equipment at French ports *413
American Diesel-engined motorship *208
American load line. Capt. C. A. McAllister 765
American merchant marine, Congress grapples with the problem of an. Waldon Fawcett 515
American merchant marine, future of from standpoint of operator. O. C. Chapman 381
American merchant marine, reconstruction and extension of 49
American merchant marine, suggestion for building up. William T. Bonner 292
American merchant marine, suggestions for profitable operation of. H. C. Dinger 806
American sea-going merchant shipping on January 1, 1919 360
American Shipbuilding Company launches 108 vessels 270
American vessels carry 70,000 tons of Russian railroad equipment *538
Analysis of freight movements at terminals. H. McL. Harding *88
Analysis of stresses in bulkhead stiffeners (bracketed end connections). Special correspondent *729
Anderson, John W.: Marine Diesel oil engine problems *77, 165
Angle planer. E. R. Spencer *478
Annual meeting of naval architects 823
Apprenticeship course for shipfitters. W. H. Dooley 154
Araby, steamship, interesting salvage work *103
Arc welding in ship construction. Jasper H. Cox *42
Army supply base terminal, South Brooklyn *697
Artisan, tugboat *363
A southern shipbuilding and repair plant. G. F. S. Mann, B. S. *251
Atlantic Coast Shipbuilders' method of cost accounting. J. L. Jacobs *539, 638
Atlantic Corporation, shipyard of. C. E. Downton *401
Audible electric signals in industrial plants. V. Karapetoff *466
Austin, O. P.: Prices yesterday, today and tomorrow 315
Austin, W. R.: Sediment in marine boilers *552
Australia, shipbuilding in *470
Australian collier Biloela *584
Automatic ore unloaders on the Great Lakes *735
Auxiliaries, Tosi turbine-driven *99
Auxiliary machinery on British standard ships 643

Ballin composite ships of 4,400 tons, D. W. *10, 680
Barge, sea-going concrete 134
Barge, self-propelled *671
Barge terminal at St. Louis. M. von Pagenhardt *295
Barges and towboats, Mississippi river *161
Barges, canal and river *671
Barges for the navy, concrete coal and oil *494
Barges, side-launching of *104
Basswood, sea-going tug *663
Battleship fleet goes to the Pacific (photographs) *630
Battleship Idaho, U. S. (photographs) *228
Battleship New Mexico, machinery of (photographs) *693
Battleship New Mexico, United States. S. M. Robinson *323
Battleship Tennessee, electric propelling machinery of. William H. Easton *490
Bearing designs and oiling system. Engineer-Lieutenant A. E. Windram *745
Belfast, shipping developments at 115
Bement, Alon: Principles underlying ship camouflage *90
Benington, Arthur: Italian motorship Ansaldo San Giorgio I *525
Best fore-and-aft position of parallel middle body in single-screw cargo ship. William McEntee *18
Bethlehem Shipbuilding Corporation, design departments centralized at Bethlehem *767
Bethlehem Shipbuilding Corporation, destroyer plant at Squantum *446
Bethlehem Shipbuilding Corporation, Ltd., makes world's record *586
Bethlehem Shipbuilding Corporation makes world's record in shipbuilding *811
Bethlehem Shipbuilding Corporation's 20,000-ton floating dry dock *661
Biloela, 10,000-ton collier built in Australia *584
Board of trade and steel boilers 411
Boiler efficiency, fuel saved by increasing. W. D. Canan *144
Boiler furnace on destroyer, explosion in 456
Boiler, Heine marine cross drum *691
Boiler standardization, marine. C. A. Seley 147
Boilers and the Board of Trade, steel 411
Boilers rolled 28 miles along California coast, Scotch. C. W. Geiger *455
Boilers, sediment in marine. W. R. Austin *552
Boilers, shipping large marine *17
Bolinder oil engines, motorships fitted with. Charles W. Geiger *129
Bonner, William T.: Suggestion for building up the American merchant marine 292
Bonner, William T.: Suggestion for simplifying fabricated stern frame by electric welding *345
Bossing for cargo vessels, internal. E. de Brinja *752
Bradlee, F. B. C.: Centenary of transatlantic steam navigation *347
Bradlee, F. B. C.: Pioneer ships in American ocean trade *618
British admiralty cancels orders for 326 vessels in eight months 538
British dirigible R-34 ..... *496
British standard ships, auxiliary machinery on 643
British warships built during the war. Sir Eustace Tennyson D'Eyncourt, K. C. B. *385, 495, 559
Broken web of six-ton crank shaft repaired by welding *624
Browning, R. R.: Production speed, oxy-acetylene cutting one answer 678
"B" type steamship building at Hog Island Shipyard, 8,000-ton 737
Building the Ford submarine-chaser "Eagle" *23
Building wooden vessels on the Pacific *8
Bulkhead stiffeners, an analysis of stresses in. (Bracketed end connections.) Special correspondent *729
Bulkhead stiffeners, investigation into *474, 554
Bunker coal for transatlantic shipping 202
Butt welding in ship construction. Jasper H. Cox *42

Callao, rebuilt at Panama canal shops 668
Camouflage, principles underlying. Alon Bement *90
Camouflaging, German. Carl E. Peterson *103
Canal and river vessel construction now under way, program of *671
Car floats, concrete; method of constructing *352
Cargo handling equipment at French ports, American *413
Cargo handling, short cuts in. Paul Teas *482
Cargo ship, steel, plans for Hog Island 7,500-ton *71
Cargo ships, economical. A. J. C. Robertson *799
Cargo ships, propulsive efficiency of single-screw. William McEntee *796
Cargo ships, some aspects of large Diesel. H. R. Setz *212
Cargo steamer, Italian geared turbine *94
Cargo vessel, 9,600-ton deadweight *200
Cargo vessel, Poughkeepsie, 8,800-ton deadweight *531
Cargo vessel, "Robert Dollar" type, 8,800 tons deadweight *204
Cargo vessel Schenectady, turbine-driven, 7,500 tons *350
Cargo vessel, 3,500-ton deadweight *206
Carolina Shipbuilding Corporation *240
Centenary of transatlantic steam navigation. F. B. C. Bradlee *347
Chain links and shackles, design of. Arthur Raymond *705
Chairman Hurley's plans for operation of merchant marine 187
Chapman, Lawrence B.: Education and training of a naval architect 223
Chapman, Lawrence B.: Problems of the American merchant marine 317
Chapman, O. C.: Future of merchant marine from standpoint of steamship operator 381
Charts for design of propelling machinery for cargo ships. James L. Haynes *132
China, progress of shipbuilding in 398
Churchill, Creighton: Cost system for shipyards *486, 545, 641
City of Eureka built in 37 days, 8,800-ton freighter *484
City of Portland, motorship *129
Clamping device used in manufacturing ship ladders. Charles C. Phelps *383

Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

Coal for transatlantic ships, bunker 202
Coaling apparatus, mechanical; Michener elevator *425
Collier built in Australia, 10,000-ton, Biloela *584
Columbia River Shipbuilding Corporation builds freighter in 37 days *484
Coming mechanical devices that will make ship-loading economical *415
Composite ships fitted with diagonal strapping 399
Composite ships of 4,400 tons D. W. Ballin *680
Concrete barge, sea-going 134
Concrete barges, side-launching of *104
Concrete building slips for 1,000-foot vessels 74
Concrete car floats, method of constructing *352
Concrete coal and oil barges for the navy *494
Concrete shipyard on Lake Erie *352
Congress and the merchant marine. Waldon Fawcett 601
Congress grapples with the problem of American merchant marine. Waldon Fawcett 515
Congressional investigation of merchant marine. Waldon Fawcett.. 793
Construction news of the month 308, 372, 439, 507, 571, 659, 716
Construction of 5,000-ton ship, control of —V *29
Construction of Newburgh shipyard *231
Control of the construction of a 5,000-ton deadweight fabricated steel ship —V *29
Convention, annual, of naval architects 823
Cost accounting in shipbuilding, uniform. J. L. Jacobs *539, 638
Cost of high speed. S. G. Koon *357
Cost of manufacturing ships. Frederick Thorne Warner *489
Cost system for shipyards. Creighton Churchill *486, 545, 641
Costs of shipbuilding 316
Costs, operating crane *413
Cox, H. Jasper: Electric welding in ship construction *42
Cracked cylinder head repaired by welding *617
Crane at Boston navy yard, electrically-operated pontoon, 150-ton *688
Crane costs in United States, operating *413
Crane, fitting-out 168
Crank shaft repaired by welding *624
Cranes, Erie Railroad pier equipped with revolving jib gantry *493
Cranes, special types in shipyards.. 75
Cross drum boiler, Heine marine *691
Crude-oil motors vs. steam engines in marine practice. J. W. Morton *703
Cruiser stern on standard British vessels. T. J. Smith *562
Cumberland Shipbuilding Company *459
Curaca, repair of, unique engineering feat *537
Curtis turbine, geared, 2,500-horsepower. Cargo vessel Schenectady *350
Cushing, first U. S. destroyer *577

Davis, W. E.: Keeping the engine room log *558
de Brinja, E.: Internal bossing for cargo vessels *752
Declivities of launching ways. W. Jonsen *428
Delano, H.: Shipping possibilities of Yangtse Kiang river *395
Delungra, 5,500-ton steamship *470
Dent, latest U. S. destroyer *577
Design and construction of producer gas power lighter. Frederic S. Nock *36
Design departments of Bethlehem Shipbuilding Corporation centralized at Bethlehem *767
Design of propelling machinery, charts for. James L. Haynes *132
Design of shackles and long chain links. Arthur Raymond *705
Designing marine machinery for economy. Commander H. C. Dinger 743
Destroyer Cushing *577
Destroyer Dent *577
Destroyer, evolution of the. Commander S. W. Robinson *577
Destroyer plant at Squantum, the Victory *446
Destroyer Reid built in 45 working days *811
Destroyer Turner *822
Destroyers of the Paulding class *577
Destroyers of the Smith class *577
Destroyers of the Stewart class *577
Destroyers of the Wadsworth class *577
Development of river docks and terminals on the Mississippi river 429
Developments in Diesel engine construction in United Kingdom 813
D'Eyncourt, Sir Eustace Tennyson: Naval construction during the war *385, 495, 559
Diablo, trials of 561
Diagonal strapping for composite ships 399
Diesel cargo ships, some aspects of large. H. R. Setz *212
Diesel engine construction in United Kingdom, developments in 813
Diesel-engined motorship, American *208
Diesel engines and the merchant marine 549
Diesel engines on the Pacific coast. Bruce Lloyd 549
Diesel engines, tests of merchant ship-type 551
Diesel oil engine problems, marine. John W. Anderson *77, 165
Diesel oil engine, Winton *419
Dinger, H. C.: Designing marine machinery for economy 743
Dinger, H. C.: Suggestions for profitable operation of American merchant marine 806
Dirigible R-34, British *496
Docks and terminals, development on the Mississippi river 429
Dooley, W. H.: An apprenticeship course for shipfitters 154
Dow, George A.: Performance of the Libby Maine 550
Dravo Contracting Company launches towboat Elsey practically complete 359
Drifters and trawlers *665
Dry dock, floating, 15,000-ton *464
Dry dock for Savannah, new floating 690
Dry dock, 30,000-ton, Morse *781
Dry dock, 20,000-ton floating *661
Dry dock with reduced draft 74

"Eagle," building the Ford submarine-chaser *23
Easton, William H.: Electric propelling machinery of battleship Tennessee *490
Economic aspects in the engineering field, new lights on *106
Economical cargo ships. A. J. C. Robertson *799
Economical motorships on the Pacific. Charles W. Geiger *129
Economical ship loading devices, coming *415
Economy, designing marine machinery for. Commander H. C. Dinger 743
Education and training of a naval architect. Lawrence B. Chapman 223
Efficiency, increasing boiler. W. D. Canan *144
Efficiency, increasing stoke-hole. A. Pohlman 792
Efficiency of single-screw cargo ships, propulsive. William McEntee *796
Efficient layout and management of plate and angle shop. G. F. S. Mann *139
8,000-ton or "B" type steamship building at Hog Island Shipyard 737
Electric arc welding in ship construction. Jasper H. Cox *42
Electric drive on merchant ships. W. L. R. Emmet 335
Electric drive on New Mexico. S. M. Robinson *323
Electric propelling machinery of the battleship Tennessee. William H. Easton *490
Electric propulsion of merchant ships. W. L. R. Emmet *814
Electric signals in industrial plants, audible. V. Karapetoff *466
Electric welders, hints for 637
Electric welding in ship construction. Jasper H. Cox *42, 95
Electric welding of broken crank shaft *624
Electric welding of cracked cylinder head *617
Electric welding, suggestion for simplifying fabricated stern frame. William T. Bonner *345
Electric welds, inspection of. O. S. Escholz *749
Electrical equipment of sub-marines *762
Electrical repairs on ex-German ships. J. S. Jones *818
Electrically-operated pontoon crane at Boston navy yard, 150-ton *688
Elevator, Michener coaling *425
Elevators on mine-laying fleet made possible steady flow of mines to launching deck *293
Emmet, W. L. R.: Electric propulsion of merchant ships *814
Engineering duties, training of enlisted personnel of United States navy for. Lieutenant-Commander R. R. Smith 685
Engine, motorships fitted with Bolinder. Charles W. Geiger *129
Engine, Pittsburgh marine oil *629
Engine problems, marine Diesel oil. John W. Anderson *77, 165
Engine room log, keeping the. W. E. Davis *558
Engine, Winton marine Diesel *419
Engine, new method of erecting reciprocating. K. M. Walker *105
England and France, some things I saw and heard in. H. L. Aldrich *67
Enlisted personnel of United States navy for engineering duties, training of. Lieutenant-Commander R. R. Smith 685
Erecting marine reciprocating engines, new method of. K. M. Walker *105
Erie Railroad pier equipped with revolving jib gantry cranes *493
Escholz, O. S.: Inspection of metallic electrode arc welds *749
Evolution of submarine detector 591
Evolution of the destroyer. Commander S. M. Robinson *577
Experiments on simplified ship forms. H. C. Sadler and T. Yamamoto *141
Explosion in boiler furnace on destroyer 456

Fabricated Ship Corporation. Arthur F. Johnson *262
Fabricated steel ship, control of construction of —V *29
Fabricated steel ship, plant for 9,000-ton. John M. Sweeney *12
Favorite nearing completion on the Great Lakes, wrecking steamer 265
Fawcett, Waldon: Congress and the merchant marine 601
Fawcett, Waldon: Congress grapples with the problem of an American merchant marine 515
Fawcett, Waldon: Merchant marine hearings in Washington 793
Federal Shipbuilding Company, yard of *266
Ferris and Hough designs, 3,500-ton wooden ships *9
Fitting-out crane 168
Fitting-out wharf at Fore River plant, new 805
5,000-ton all wood steamer *10
5,000-ton ship, control of construction —V *29
Floating dry dock, 15,000-ton *464
Floating dry dock for Savannah, new 690

MA
v.24
REMOTE STORAGE

Floating dry dock, 20,000-ton..... *661
Follow-up department at Squantum. G. Hobart Stebbins..... 409
Forbes, W. D.: Lubricating marine machinery 152
Ford submarine-chaser "Eagle," building the *23
Fore-and-aft position of parallel middle body in single-screw cargo ship. William McEntee..... *18
Fore River plant builds new fitting-out wharf 805
Fore River yard delivers destroyer Turner *822
Forge shop 168
Foundation Company's New Orleans yard *237
Foundry 168
F. Q. Barstow, oil tanker repaired in 64 days 321
France and England, some things I saw and heard in. H. L. Aldrich *67
Freight movements at terminals, analysis of. H. McL. Harding.... *88
Freight steamship, modern steel, 8,800-ton. D. D. Thomas..... *592
Freight terminal operation, motor trucks and the problem of efficient. Merrill C. Horine..*518, 632, 696
Freight vessels, four 10,400-ton..... 764
Freighter Diablo, trials of..... 561
French ports, cargo handling equipment *413
Fuel oil displaced by gas in large furnaces. William J. Harris, Jr. *345
Fuel saved by increasing boiler efficiency. W. D. Canan..... *144
Furnace, Forge, Plate and Angle, Pusey & Jones Yard..... *345
Furnace on destroyer, explosion in 456
Future of merchant marine from standpoint of operator. O. C. Chapman 381

Gantry crane, Heyl & Patterson..... *493
Gas displaces fuel oil in large furnaces. William J. Harris, Jr..... *345
Gas engines, building at Norfolk Navy Yard 236
Gas generating plant for navy yards, typical. Commander H. G. Knox *720
Gatewood, William: Notes on launching *83
Gear reduction on motorship..... *208
Geared Curtis turbine, 2,500-horsepower. Cargo vessel Schenectady *350
Geared drive. N. W. Akimoff..... 16
Geared turbine cargo steamer, Italian *94
Geiger, Charles W.: Economical motorships on the Pacific..... *129

Knox, H. G.: The use of acetylene in navy yards *720
Koon, Sidney Graves: On the great cost of high speed *357
Koppel, Harwood: Shipbuilding in foreign countries in 1919..... 605

Labor administration, problems in. Dwight Lowell Hoopingarner..... 627
Lake steamer, 3,500-ton deadweight *206
Large program of river and canal vessel construction now under way *671
Launch designed for explorer..... *529
Launching, notes on. William Gatewood *83
Launching of concrete barges, side *104
Launching ways, declivities of. W. Jonsen *428
Launchings, side, observations on. John A. McAleer *746
Layout and management of plate and angle shop. G. F. S. Mann.... *139
Layout of typical gas generating plant for navy yard use. Commander H. G. Knox..... *720
Libby Maine, performance of the. George A. Dow 550
Liberty Shipbuilding & Transportation Co., concrete ship yard.... *352
Lifeboat transportation and lowering gear, Ross-Anderson..... *483
Lifeboats, manufacturing standardized. Morris M. Whitaker..... *157
Lighter, design and construction of producer gas power. Frederic S. Nock *36
List of vessels contracted for by United States Shipping Board Emergency Fleet Corporation..... 170
Lloyd, Bruce: Diesel engines on the Pacific coast..... 549
Load line, an American. Capt. C. A. McAllister 765
Log, keeping the engine room. W. E. Davis *558
Lubricating marine machinery. W. D. Forbes 152
Lukens new plate mill *101

Machine shop 168
Machinery for American merchant vessels. H. C. Dinger..... 135
Machinery installation by Jacksonville plant. E. T. Hollingsworth, Jr. *407
Machinery, lubricating marine. W. D. Forbes 152
Machinery, marine, designing for economy. Commander H. C. Dinger 743
Machinery of battleship New Mexico (photographs) *693
Machinery on British standard ships, auxiliary 643
Malcher, L. M.: Large cylinders restored by oxy-acetylene welding *426
Management and layout of plate and angle shop. G. F. S. Mann.... *139
Manitowoc Shipbuilding Company.. *271
Mann, G. F. S.: A southern shipbuilding and repair plant..... *251
Mann, G. F. S.: Layout and management of plate and angle shop *139
Manufacturing ships, cost of. F. T. Warner *489
Manufacturing standardized lifeboats. Morris M. Whitaker..... *157
Marine boiler standardization. C. A. Seley 147
Marine boilers, sediment in. W. R. Austin *552
Marine construction news of the month 308, 372, 439, 507, 571, 659, 716, 779, 845
Marine Diesel oil engine problems. John W. Anderson.....*77, 165
Marine Diesel oil engine, Winton.. *419
Marine machinery, designing for economy. Commander H. C. Dinger 743
Marine machinery, lubricating. W. D. Forbes 152
Marine oil engine, Pittsburgh..... *629
Marine terminal railway. H. McL. Harding 741
Marine terminals and foreign commerce. H. McL. Harding..... *149
Marine terminals as municipal investments. H. McL. Harding..... *480
Marine terminals, for future or past? James A. Shepard..... 622
Marine turbine governors. P. M. Robinson *689

Merchant vessels again manned by merchant sailors 76

Naval architects, women as..... 115

Obituary 62, 124, 186, 312, 378, 510, 576, 658
Organizing the employment department 55
Oxy-acetylene welding in Great Britain 294

Personal 62, 124, 186, 312, 378, 442, 510, 576, 658, 844

Reinforced concrete steamer Armistice 245
Repairs to boilers by welding..... 265

Ship construction, improvements in 255
Shipbuilding in the world, merchant 587
Shipping losses, Japanese..... 565
Shipping policy, National Merchant Marine Association 703
Shipyard employment managers' annual meeting 490
Steamboat Inspection Service, activities of 321
Submarine, swiftest in the world.... 759
Submarines, Vickers' 227

Towing feat, an interesting..... 604

Vickers' submarines 227

Welding ships, economies expected by 207
Witherington, British destroyer..... 766
Women as naval architects..... 115

QUESTIONS AND ANSWERS

Amount of pressure 433
Angle of roll 841
Appendage resistance 711
Approximate I. H. P. formula for reciprocating engine 841
Attached versus independent pumps 501

Bilge suction lines 501
Boiler spares 501
Bolts, stress in column *433
Bracket, development of a flanged *178

Ceiling, tank top 565
Column bolts, stress in..... *433
Cost of vessel's hull and machinery 178
Cost, operating 5,000-ton deadweight steamer 775
Crank pin, "push" and "pull" on.... 114
Cut-off, point of *114, 433
Cylinder, effect of linking up high-pressure 114

Design of piston ring..... *177
Design, yacht 177
Development of a flanged bracket.... *178
Development of hawse pipe..... 114
Development of shell plating..... 301
Diesel engine, indicated horsepower of *367
Division of work in engine department 501
Duties of loftsman, shipwright and shipfitter 114

Eccentric, valve movement by shifting *115
Economical speed of vessels..... 501
Effect of linking up high-pressure cylinder 114
Efficiency of motorship propeller.... 367
Engine and propeller for motorboat 649
Engine department, division of work in 501
Engine, horsepower of a triple expansion *54
Engine, indicated horsepower of Diesel *367

Fastening zinc plates in boilers..... 367
Feed pumps, size of attached..... 54
Feed water, make-up 433
5,000-ton steamer, operating cost of 775
Flanged bracket, development of.... *178
Formula for I. H. P. of reciprocating engine 841
Formula for power of motorboat.... 841

Hawse pipe, development of..... 114

Horsepower formula for reciprocating engine 841
Horsepower of a triple expansion engine *54

Indicated horsepower of Diesel engines *367

Layout, steering gear..... 649
Linking-up high pressure cylinder, effect of 114
Loftsman, duties of..... 114

Make-up feed water 433
Measurement of vacuum..... 711
Motor boat, engine and propeller for 649
Motorboat, power formula for..... 841
Motorship, efficiency of propeller.. 367

Operating cost, 5,000-ton deadweight steamer 775

Paint, weight of 841
Piping systems in merchant and naval practice 775
Piston ring design *177
Pitch of propeller *301
Plating, development of shell..... 301
Point of cut-off..... *114, 433
Power formula for motorboat..... 841
Pressure, amount of..... 433
Propeller efficiency of motorship.... 367
Propeller for motorboat..... 649
Propeller, pitch of..... *301
Pumps, attached versus independent 501
Pumps, size of feed..... 54
"Push" and "pull" on crank pin.... 114

Relieving tackle *649
Resistance, appendage 711
Ring, design of piston..... *177
Roll, angle of 841

Tackle, relieving *649
Tank top ceiling 565
Triple expansion engine, horsepower of a..... *54

Seven seas 775
Shackles, stress in 565
Shell plating, development of..... 301
Shipfitter, duties of 114
Shipwright, duties of..... 114
Size of attached feed pumps..... 54
Speed of a vessel, economical..... 501
Steamer, operating cost of..... 775
Steering gear layout..... 649
Stress in column bolts..... *433
Stresses in shackles 565
Suction lines, bilge 501

Vacuum, measurement of..... 711
Valve movement by shifting eccentric *115

Water level in gage glass and in boiler 177
Weight of paint 841

Yacht design 177

Zinc plates, fastening in boilers..... 367
